DETAILED ACTION

1. This Office Action is in response to RCE filed 4 October 2004. Remarks and amendments received 29 July 2004 have been considered. Claims 23, 32, and 35 have been amended. Claims 21-39 are pending.

Claim Rejections - 35 USC § 112

2. In view of the amendments to claims 23 and 35, the prior 35 USC 112 second paragraph rejections are hereby withdrawn.

Claim Objections

3. In view of the amendment to claim 32, the prior claim objection is hereby withdrawn.

Allowable Subject Matter

4. Claims 21-39 are allowed.

5. The following is an examiner's statement of reasons for allowance:

Examiner has performed an update search, which produced a related prior art, US PreGrant Pub 2003/0131338 A1 to Georgalas.

Georgalas disclosed [0031] modeling in reference to XML, [0034] "a class acts like a template...", and [0035] "...constraints...specify certain limitations a designer wants to apply..." and "policies are used as the means to specify behavior..." While Georgalas suggested that a designer may specify constraints, he failed to explicitly specify such limitations as **"each code section utilizes one of the following object-oriented classes** each of which models a type of markup language element: **an inline class...**in which other markup language elements **cannot be nested**, and which comprises an opening tag, an argument and no closing tag; and a **container class...**in which other markup language elements **can be nested**, and which comprises

Art Unit: 2191

an opening tag, a closing tag, and an argument disposed between the opening and closing tags”, as recited in independent claim 21. (emphasis added)

Similarly, independent claim 32 recites limitations: “a **first type of markup language element** in which other markup language elements **cannot be nested** and which comprises an opening tag, an argument and no closing tag; and a **second type of markup language element** in which other markup language elements **can be nested** and which comprises an opening tag, a closing tag and an argument disposed between the opening and closing tags”... “...**classes each of which models either the first type or the second type of markup language element...**” (emphasis added)

Taken in consideration with remaining limitations of the entire claim, independent claims 21 and 32 would not have been obvious, taken alone or in combination with prior art of record. Thus remaining dependent claims, claims 22-31 and 33-39 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”

Conclusion

Art Unit: 2191

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
